

ABHISHEK MEENA

Full Stack Developer | MERN Stack | Responsive Web Applications

+91 7489605364 • mabhi7411@gmail.com • github.com/abhii-byte1 • linkedin.com/in/abhishek-meena-0647663a0

OBJECTIVE

IEEE-published researcher and Full Stack Developer pursuing B.Tech in AI & ML, with real-world internship experience and independent MERN stack projects.

Built production-grade applications featuring RESTful APIs, JWT role-based authentication, geolocation systems, and MongoDB/SQLite databases.

Comfortable across the full stack — from React/Tailwind frontends to Node.js/Express backends — with strong version control and clean code practices.

TECHNICAL SKILLS

Languages	JavaScript, Python (OOP)
Frontend	React, Vite, Tailwind CSS, HTML, CSS
Backend & Database	Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Authentication
Core Concepts	OOP, Data Structures, CRUD, SDLC
Tools & Practices	Git & Version Control, Clean Code, Debugging & Optimization
Soft Skills	Team Leadership & Coordination, Strong Written & Verbal Communication, Deadline-driven Execution

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML)

Oriental Institute of Science and Technology, Bhopal | 2023 – 2027 (Ongoing) • CGPA: 7.56 / 10

CERTIFICATIONS

- Front End Developer Intern – Webmitr Digital Pvt. Ltd. (Nov 2025)
- Web Development – Coding Thinker (2024–2025)
- Smart Samadhan Hackathon – OIST, Bhopal
- Main Author – IEEE Paper, CODE 2K26 (2nd National Conference on Computational Optimization & Data Engineering)
- Lead Researcher – 'Women Safety Tool', IJRPA Journal

PROJECTS

ShieldHer — Women Safety SOS Tool | HTML5, Vanilla JS, Node.js, Express.js, SQLite

github.com/abhii-byte1/women-safety-tool-updated | Live: women-safety-tool-updated-1.onrender.com

- Built a full-stack SOS web app with one-tap emergency activation, live GPS geolocation streaming, automated WhatsApp alert dispatch, and a loud alarm siren — all from a single HTML interface served by a Node.js/Express backend.
- Designed a 4-table SQLite schema (profile, contacts, sos_logs, feedbacks) with a safe-cancel state engine to prevent accidental SOS misfires;
- published as lead author in IJRPA and IEEE (CODE 2K26).

Smart Waste Management System | React, Vite, Node.js, Express, MongoDB, Tailwind CSS

github.com/abhii-byte1/smart-waste-management-system | Live: smart-waste-management-system-2-2817.onrender.com

- Built a full-stack civic complaint platform with role-based JWT auth (admin/user), separate dashboards, and real-time complaint status tracking using React + Vite frontend and a modular Node.js/Express/MongoDB backend.
- Architected a scalable MVC backend with dedicated controllers, middleware, routes, and services layers;
- seeded default admin and user accounts for rapid demo and deployment readiness.

INTERNSHIP

Full Stack Developer Intern | Webmitr Digital Pvt. Ltd. | November 2025

- Built and deployed responsive web interfaces using HTML, CSS, and JavaScript, directly improving cross-device UI consistency for client-facing pages.
- Collaborated with a 3-member dev team through the full SDLC — from requirement analysis to deployment — using Git for version control and branch management.
- Debugged and resolved front-end rendering issues, reducing UI defects and contributing to cleaner, maintainable production code.
